We Assist with solutions to complex problems
We Create new models and lines
We Manufacture

DEDICATED TO DETAIL

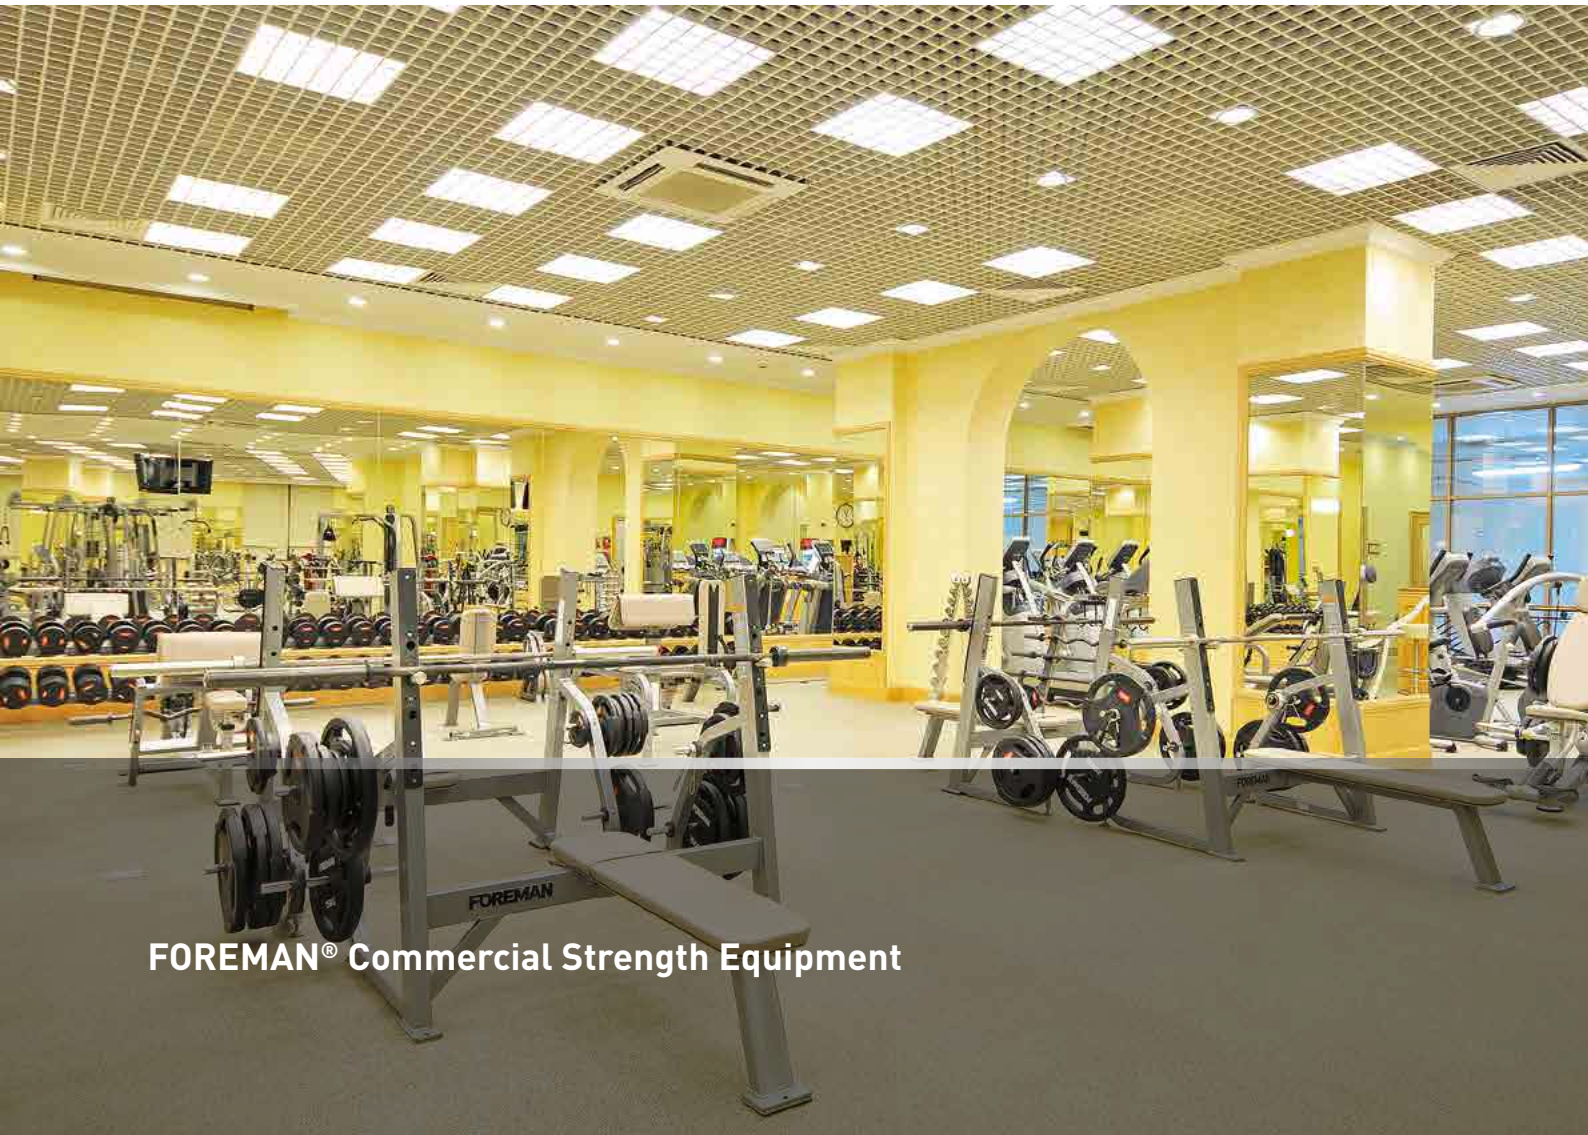

What is the key element of a training facility? Right, a GYM! This is your sales point, heart of your club, biggest expense and eventually a generator of revenues. It is a tool for your members to achieve their training goals!

And what is the most essential part of it? Equipment! CV, Selectorized Machines, Plate Loaded, Functional Training, Free Weight Stations, Frames for Cross-Fit, Benches and Racks...All of this, you can find in the extensive FOREMAN® product range.

Equipment is the revenue tool for commercial facilities and the backbone of non-profit institutions. It should not only satisfy the users needs but be reliable enough to avoid their complaints and minimize service expenses for the owner.

When evaluating all features and technical information from a vendor and choosing a manufacturer, it is recognized that modern design aesthetics and fashion elements should be balanced with durability, reliability and price. While a small footprint should support overall design and functionality, user attraction to the equipment should be equal to correct bio-mechanics.

By using kevlar belts, we have created machines with a small footprint and eliminated backlash while delivering extremely smooth motion. By using 3mm-thick high grade steel we made our machines solid and inviting and together with our superior biomechanical designs, they are perfect for users of any age, weight or height.

FOREMAN® Commercial Strength Equipment

Engineered by an industry leader, Dennis Phelps, having 25 years experience in creating and designing strength equipment in the U.S., our machines utilize only quality components from reliable vendors. We listen to needs of our customers, follow industry trends, creating new models, inventing new products, improving industry standards.

Our products are well recognized globally and we are proud to count such brands as Crunch, UFC, Hard Candy, Fitness First and many others among our customers.

We invite you to explore our product range and join the club of Foreman fans. You will appreciate our dedication to detail.

Yours, The FOREMAN Products Team
